PROFESSIONAL SUMMARY

Full Stack Engineer with 11+ years of experience owning products end-to-end from system design to deployment to production support with deep specialisation in fintech, and AI-powered automation.

At Wingspan, I built incoming payments verification systems to combat fraud, architected **AI agents using n8n and Claude** to debug critical payment issues, and delivered internal tooling that **saved operations teams 5-10 hrs/week**. I don't just ship features, I take problems off the table.

Frontend-heavy full stack across React, Next.js, TypeScript, Node.js, and gRPC. Proven in high-stakes, on-call fintech environments where payroll and funds movement can't fail.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, HTML, CSS

Frameworks: React, Next.js, React Native, Node.js, Express.js, MongoDB, TanStack Query

DevOps & Infra: Google Cloud Platform, Docker, Git, CI/CD, AWS (S3, CloudFront, Route53, WAF)

AI & Automation: Claude Code, n8n, AI Agents, Context Engineering, Prompt Engineering

Architecture: gRPC, Microservices, REST APIs, System Design, Clean Architecture, TDD

EXPERIENCE

Full Stack Engineer — FinInfra | Wingspan | Remote, India

May 2025 – Present

- Built an **incoming payments verification system** to detect and control fraudulent transactions, improving both fraud prevention and operational visibility for the Finance & Ops teams
- Implemented a **critical alerts system** that automatically paged relevant teams, reducing response time for high-severity production incidents
- Architected **AI agents using n8n and Claude** to autonomously debug critical payment processing issues, reducing time-to-resolution for the engineering team
- Built an internal tool for Operations & Support teams that **saved ~5–10 hrs/week** by eliminating routine engineering dependencies, directly shortening customer turnaround times
- Contributed to the **risk-signals project** enabling the Compliance team to proactively identify and act on high-risk users, improving regulatory response time
- Served as **on-call engineer** for critical payroll and funds-movement issues, ensuring high availability and rapid incident response for time-sensitive financial operations
- *Tools: MERN stack, Next.js, TanStack Query, Google Cloud Platform, n8n, Claude Code, AI Agents*

Full Stack Engineer — Platform | Wingspan | Remote, India

July 2020 – Apr 2025

- Owned the **payer invoicing configuration project end-to-end** from system design through deployment significantly improving invoicing experience for Wingspan's major enterprise clients
- **Reduced bulk upload time by 50%** and implemented bulk payables & contractor onboarding, enabling large clients to process payrolls at scale
- Built the **notifications microservice from scratch** and integrated it across services via gRPC, decoupling a critical communication layer from the monolith
- Automated internal library releases and set up Storybook style-guide, **saving ~15–20 hrs/month** in developer overhead
- *Tools: MERN stack, Next.js, Storybook, TanStack Query, gRPC, GCP, Testcafe, Browserstack*

Lead Software Engineer | CyberEye | Hyderabad, India

Apr 2019 – Feb 2020

- **Led a frontend team** across the full SDLC — sprint planning, architecture decisions, and delivery ownership
- Drove adoption of **Clean Code principles and Clean Architecture** across the team, raising code quality and maintainability standards
- Championed frontend modernisation initiatives including **TypeScript migration, Apollo GraphQL, and React Hooks** via POCs

Senior Software Engineer | CyberEye | Hyderabad, India

Apr 2017 – Mar 2019

- Introduced a **services layer in the frontend architecture**, decoupling UI from backend REST APIs and enabling fully testable data storage classes
- **Reduced CI/CD build time by 50%** and configured pipelines for web and mobile applications
- Built reusable React/React Native component library, **saving 15–20 hrs** of developer time
- *Tools: Codeship, CloudFront, S3, IAM, Route53, WAF*

Software Engineer | CyberEye | Hyderabad, India

May 2015 – Mar 2017

- Developed responsive, cross-browser web apps and cross-platform mobile apps as part of an agile team
- Contributed across the stack — UI components, API integration, state management, and unit testing
- *Tools: React, React Native, MobX, Redux*

EDUCATION

RGUKT IIIT Nuzvid

B.Tech, Computer Science | CGPA: 8.5

Jun 2011 – Apr 2015
